

Hydraulic Axial Piston 9T-7099 Pump Type Hydraulic Axial Piston 0R-7950 for D6R D6H Tractor Excavator

Our Product Introduction

for more products please visit us on hydraulicmachineryparts.com

Basic Information

- Place of Origin: China
- Brand Name: HALCYON
- Model Number: D6R
- Minimum Order Quantity: 1 piece
- Price: Negotiable
- Packaging Details: Wooden Box+Pallet
- Delivery Time: In Stock: 1-3 day(s); Out of Stock: Customization time depend on specific circumstances
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 900 pieces per month

Product Specification

- Usage: Hydraulic Piston Pump
- Application: Industrial Machinery
- Power: Hydraulic
- Pressure: High Pressure
- Type: Swash-plate Type Axial Piston Pump
- Feature: Printed
- Highlight: Hydraulic axial piston pump for Caterpillar, 9T-7099 hydraulic pump for excavators, CAT D6R tractor hydraulic pump

Product Description

Hydraulic Axial Piston 9T-7099 Pump Type Hydraulic Axial Piston 0R-7950 for CT D6R D6H Tractor Excavator

Product Attributes

Attribute	Value
Usage	Hydraulic piston pump
Application	Industrial machinery
Power	Hydraulic
Pressure	High Pressure
Type	Swash-plate type axial piston pump
Feature	Printed

Product Description

This product is a swash plate piston-type closed-circuit dual pump, independently produced by our company. It is used in the closed-circuit system of skid steer loaders.

Swash plate type axial piston variable double pump, with two axial piston rotary components, for hydrostatic transmission in closed circuits

Making the swash plate swing past the neutral position can smoothly change the direction of the liquid flow

The driving speed is proportional to the displacement, and the flow can be infinitely adjustable

The control mode is hydraulically controlled direct-acting type, which controls the pump displacement by directly regulating the pressure in the piston chamber, thereby controlling the rotation speed of the travel motor. It is equipped with a high-pressure relief valve and a DA valve. The volumetric efficiency is $\geq 92\%$, the mechanical efficiency is $\geq 86\%$, and the oil seal of the hydraulic pump skeleton is made of fluororubber.

GUANGZHOU HALCYON

GLANCE AT THE WORKSHOP

Company Introduce

Guangzhou Halcyon-Hydraulic Co. Ltd is a national high tech enterprise located in Guangzhou High Tech Development Zone. We specialize in high end fluid intelligent equipment, high pressure plunger pumps and motors, components, and aftermarket services. Our two thousand square meter facility is equipped with dozens of units of advanced machines, enabling strong R and D, precision manufacturing, and fast product delivery. Since its establishment, Halcyon-Hydraulic has always regarded research and development innovation as the driving force for its development. With rich experience and acute market insight, they closely follow the international cutting edge technological trends and continuously invest a large amount of resources in the research and development of new products and the optimization and upgrading of existing ones. Our team of more than 80 professionals includes 4 dedicated R and D engineers and a quality inspection team of 4 inspectors who ensure every product meets rigorous standards. We maintain close industry academic collaborations with leading universities to drive continuous innovation and technical advancement. Certified under I S O 9 0 0 1 and the intellectual property management system. With 15 years of export experience, our products are widely applied in aerospace, marine, energy, and industrial sectors, serving clients across North America, Europe, Southeast Asia, and beyond. Driven by technology and craftsmanship, we are committed to becoming a top tier manufacturer and service provider of intelligent fluid equipment delivering efficient, reliable, and smart hydraulic solutions worldwide. We are willing to join hands with our customers to create a bright future for the hydraulic pump and motor industry together.

Compatible Brands and Models

We can offer perfect interchangeable replacements of many world's renowned brands including Rexroth, Eaton, Parkers, Kawasaki, Tokimec, Sauer-danfoss, Komatsu and more.

Brand Name	Model Number
Rexroth	A10VSO10/18/28/45/60/63/71/85/100/140 A2F12/23/28/55/80/107/160/200/225/250/350/500/1000 A4VSO40/45/50/56/71/125/180/250/355/500/750/1000

Kawasaki	K3V63/112/140/180/280DT K3SP36/K7SP36/K7V63 K5V80/140/160/180/200

Eaton	EATON 3331/4621(4631)/5421 (5431)/6423/7620(7621) PVE19/21 TA19 PVH45/57/74/98/131/141

Frequently Asked Questions

Q1. Why choose us?

More than 20 years of experience in hydraulic parts design and 14 years of experience in manufacturing branded quality of piston pumps and motors. As a reputed factory supplier, We have many modern production machines and testing equipment, as well as a strict and renowned quality management system. Welcome ODM/OEM inquiry with high quality demand.

Q2. Can I customize the product?

Absolutely. Actually customizing service according to drawing or request, is the most advantage and big difference between HALCYON and common suppliers. We have excellent technical precipitation and mature production process in hydraulic industry.

Q3. Can I have free samples?

Usually no, but negotiable according to different products and orders.

Q4. What's the delivery time?

10-60 days after payment, according to different products and orders.

Q5. How to order?

Inquiry -> Quotation -> Negotiation -> Samples -> PO/PI -> Down payment -> Mass production -> Quality inspection -> Book Space -> Balance/Delivery -> Further.
